

Men Ultra-Weight Pentathlon Scoring Spreadsheet										2010										Rex Harvey 7Jul10									
All throws with all weights are age factored back to 35# throw as that is the standard IAAF Weight for Open Men.																													
The Age Factored Performance (AFP) is rounded back to the shorter centimeter, then scored with 1985 IAAF 35# Weight Scoring Tables.																													
Points = a (Age Factored Performance - b) ^ c Men; a=47.8338, b=1.5, c=1.05 Women; a=52.1403, b=1.5, c=1.05																													
Required Entries: Age and performance (in meters) in each of the five proper events for that age group.																													
Copy and rename this file for each new competition. Copy and paste more rows as needed.																													
Ultra-Weight Throws Pentathlon Table of Implements																													
		Weight	Super Weight	25#	35#	44#	56#	98#	200#	300#																			
Men	Open-49	35#	56#					X	X	X																			
	50-59	25#	56#					X	X	X																			
	60-69	20#	44#				X	X	X																				
	70-79	16#	35#			X	X	X																					
	80+	12#	25#		X	X	X																						
Be sure that each person throws the proper weights for their age group and throws them in the proper order: light to heavy.																													
If six throws are given in a competition, only the first three count for the Pentathlon. Anything else does not count.																													
Example:
